- Languages:** JavaScript, HTML, CSS, Python, TypeScript
- Frontend:** React.js
- Backend:** Node.js, Express.js
- Databases:** MongoDB
- Software Design:** SOLID principles, design patterns, system design
- Version Control:** Git, GitHub
- Other:** REST APIs, authentication, MVC architecture

LANGUAGES

- English:** Fluent

WORK EXPERIENCE

FLO-FM

Fullstack Developer

- Built web apps from scratch using MERN (MongoDB, Express.js, React, Node.js)—they look good and run smooth.
- Managed and improved their wordpress news site.

OPEN SOURCE CONTRIBUTION(TO 2M-TEK)

Front end developer

- Helped build and improve a web app as part of an open-source project, focusing on the front-end with React.
- Worked with the team to fix bugs and add features, making the app more user-friendly.
- Used TypeScript to keep the code solid and easy to work with.
